

# MODEL VIVE

## INDOOR MODULAR ENERGY RECOVERY

Valent VIVE energy recovery ventilator is designed for indoor installation and features a compact 3-inch polymer enthalpy wheel. With modular construction that fits through a 30-inch door and can be ceiling-hung, VIVE can be installed in tight spaces like a mechanical room, attic, or basement, and is ideal for usage in schools, hospitals, high-rise buildings, and buildings with roof constraints.

### ENGINEERED FOR EFFICIENCY

- 100% outdoor air
- Electric post heat up to 25 kW
- 500-2,400 cfm
- Direct drive plenum fans
- Enthalpy wheel recovers up to 85% of latent and sensible energy

### CONSTRUCTION FEATURES

- Low-profile, modular design with 18-inch or 23-inch height
- Flexible configuration with end or side discharge, left or right side access
- Injected foam insulation
- Pre-painted exterior

### INSTALLATION AND OPERATION

- Designed for indoor installation
- Fits through a 30-inch doorway
- Single-point power
- Microprocessor controls simplify start-up and maintenance
